

Angles

Name: _____

Date: _____

Solve each problem.

Obtuse angle: an angle that is more than a 90°.

$\angle ABC =$ _____

Acute angle: an angle that is less than a 90°. Draw the angle.

2)

$\angle XYZ =$ 10°

Straight angle: an angle that is 180°.

3)

$\angle EFG =$ _____

Solve each problem.

Angles

Name: _____

Date: _____

Solve each problem.

Obtuse angle: an angle that is more than a 90°.

$$\angle ABC = \underline{135^\circ}$$

Acute angle: an angle that is less than a 90°. Draw the angle.

$$\angle XYZ = \underline{10^\circ}$$

Straight angle: an angle that is 180°.

$$\angle EFG = \underline{180^\circ}$$

Solve each problem.
