

Perimeter of a Rectangle

Name: _____

Date: _____

To find the length/width of a rectangle.

$$P = 2(L + W).$$

$$\text{Perimeter} = 2(5\text{cm} + 3\text{cm}) = 16\text{cm}$$

Find the perimeter of each rectangle?

Perimeter= _____

Perimeter of a Rectangle

Name: _____

Date: _____

5cm

To find the length/width of a rectangle.

$$P = 2(L + W).$$

$$\text{Perimeter} = 2(5\text{cm} + 3\text{cm}) = 16\text{cm}$$

Find the perimeter of each rectangle?

1)

$$\text{Perimeter} = 2(7\text{cm} + 5\text{cm}) = 24\text{cm}$$

2)

$$\text{Perimeter} = 2(14\text{ft} + 1\text{ft}) = 30\text{ft}$$

3)

$$\text{Perimeter} = 2(5\text{m} + 9\text{m}) = 28\text{m}$$

4)

$$\text{Perimeter} = 2(4\text{km} + 9\text{km}) = 26\text{km}$$

5)

$$\text{Perimeter} = 2(4\text{mm} + 12\text{mm}) = 32\text{mm}$$

6)

$$\text{Perimeter} = 2(5\text{cm} + 3\text{cm}) = 16\text{cm}$$

7)

$$\text{Perimeter} = 2(4\text{in} + 3\text{in}) = 14\text{in}$$

8)

$$\text{Perimeter} = 2(11\text{ft} + 12\text{ft}) = 46\text{ft}$$
