Perimeter of a Rectangle

Name: _____

Date: _____

Find the perimeter of each rectangle?

$$\text{Perimeter} = 2(8\text{cm} + 7\text{cm}) = 30\text{cm}$$

$$\text{Perimeter} = 2(10\text{m} + 12\text{m}) = 44\text{m}$$

$$\text{Perimeter} = 2(5\text{mm} + 16\text{mm}) = 42\text{mm}$$

$$\text{Perimeter} = 2(5\text{in} + 4\text{in}) = 18\text{in}$$

$$\text{Perimeter} = 2(11\text{in} + 7\text{in}) = 36\text{in}$$

$$\text{Perimeter} = 2(15\text{cm} + 2\text{cm}) = 34\text{cm}$$

$$\text{Perimeter} = 2(6\text{km} + 16\text{km}) = 44\text{km}$$

$$\text{Perimeter} = 2(6\text{cm} + 3\text{cm}) = 18\text{cm}$$

$$\text{Perimeter} = 2(10\text{ft} + 17\text{ft}) = 54\text{ft}$$

$$\text{Perimeter} = 2(13\text{in} + 10\text{in}) = 46\text{in}$$
