Place Value Worksheet

Write the number in the expanded form and then write in standard form.

$$\text{two hundreds, six tens, three ones} \quad \underline{200} + \underline{60} + \underline{3} = \underline{263}$$

$$\text{four hundreds, nine tens, four ones} \quad \underline{400} + \underline{90} + \underline{4} = \underline{494}$$

$$\text{seven hundreds, eight tens, three ones} \quad \underline{700} + \underline{80} + \underline{3} = \underline{783}$$

$$\text{nine hundreds, six tens, seven ones} \quad \underline{900} + \underline{60} + \underline{7} = \underline{967}$$

$$\text{five hundreds, seven tens, seven ones} \quad \underline{500} + \underline{70} + \underline{7} = \underline{577}$$

$$\text{six hundreds, four tens, five ones} \quad \underline{600} + \underline{40} + \underline{5} = \underline{645}$$

$$\text{six hundreds, seven tens, three ones} \quad \underline{600} + \underline{70} + \underline{8} = \underline{678}$$

$$\text{two hundreds, seven tens, eight ones} \quad \underline{600} + \underline{70} + \underline{9} = \underline{679}$$

$$\text{four hundreds, two tens, three ones} \quad \underline{400} + \underline{20} + \underline{3} = \underline{423}$$

$$\text{seven hundreds, eight tens, seven ones} \quad \underline{700} + \underline{80} + \underline{7} = \underline{787}$$
