

Probability

Name: _____

Date: _____

Solve the problems with the given information.

- 1) If three different coins are tossed randomly then find the probability of getting all heads?

- 2) If three different coins are tossed randomly then, find the probability of getting at least 1 head?

- 3) If three different coins are tossed randomly then, find the probability of getting one head?

- 4) If three different coins are tossed randomly then, find the probability of getting at least 2 heads?

- 5) If three different coins are tossed randomly then, find the probability of getting two tails?

- 6) If three different coins are tossed randomly then find the probability of getting at most 2 heads?

- 7) If three different coins are tossed randomly then find the probability of getting two heads?

- 8) If three different coins are tossed randomly then find the probability of getting at least 1 tail?

- 9) If three different coins are tossed randomly then find the probability of getting one tail?

Probability

Name: _____

Date: _____

Solve the problems with the given information.

- 1) If three different coins are tossed randomly then find the probability of getting all heads?

_____ $\frac{1}{8}$ _____

- 2) If three different coins are tossed randomly then, find the probability of getting at least 1 head?

_____ $\frac{7}{8}$ _____

- 3) If three different coins are tossed randomly then, find the probability of getting one head?

_____ $\frac{3}{8}$ _____

- 4) If three different coins are tossed randomly then, find the probability of getting at least 2 heads?

_____ $\frac{1}{2}$ _____

- 5) If three different coins are tossed randomly then, find the probability of getting two tails?

_____ $\frac{3}{8}$ _____

- 6) If three different coins are tossed randomly then find the probability of getting at most 2 heads?

_____ $\frac{7}{8}$ _____

- 7) If three different coins are tossed randomly then find the probability of getting two heads?

_____ $\frac{3}{8}$ _____

- 8) If three different coins are tossed randomly then find the probability of getting at least 1 tail?

_____ $\frac{7}{8}$ _____

- 9) If three different coins are tossed randomly then find the probability of getting one tail?

_____ $\frac{3}{8}$ _____
