

Probability

Name: _____

Date: _____

Solve the problems with the given information.

- 1) Emily tossed a coin three times. Find the probability of getting at least one tail.

_____ $\frac{7}{8}$ _____

- 2) John tossed a coin three times. Find the probability of getting three heads.

- 3) Austin tossed a coin three times. Find the probability of getting exactly two tails.

- 4) Michael tossed a coin three times. Find the probability of getting at least two tails.

- 5) Oliver tossed a coin three times. Find the probability of getting at least two heads.

- 6) Austin tossed a coin three times. Find the probability of getting only one head.

- 7) John tossed a coin three times. Find the probability of getting three tails.

- 8) Emily tossed a coin three times. Find the total number of outcomes.

- 9) John tossed a coin three times. Find the probability of getting only one tail.

Probability

Name: _____

Date: _____

Solve the problems with the given information.

- 1) Emily tossed a coin three times. Find the probability of getting at least one tail.

7/8

- 2) John tossed a coin three times. Find the probability of getting three heads.

1/8

- 3) Austin tossed a coin three times. Find the probability of getting exactly two tails.

3/8

- 4) Michael tossed a coin three times. Find the probability of getting at least two tails.

1/2

- 5) Oliver tossed a coin three times. Find the probability of getting at least two heads.

1/2

- 6) Austin tossed a coin three times. Find the probability of getting only one head.

3/8

- 7) John tossed a coin three times. Find the probability of getting three tails.

1/8

- 8) Emily tossed a coin three times. Find the total number of outcomes.

8

- 9) John tossed a coin three times. Find the probability of getting only one tail.
